

DIESELCURE MARINE

330 ml / 11.16 FL OZ

The only effective Additive that removes water in diesel.

For use in cruise lines, large Ships, commercial fishing, Navy, Military, personal boats, Military, and all other Marine craft & vessels.

Ideal for use in fuel Storage Tanks (small or very large).

BENEFITS:

- Ideal in large tanks (Onshore + Ship tanks)
- Makes water content in fuel combustible
- Reduces NOx and SOx emissions
- Reduces other Harmful Emissions
- Reduces Downtime & Filter Replacement
- Totally removes “gumming” + “waxing”
- Improves Engine Combustion
- Reduces freezing of fuel
- Cleans and protects the engine
- Reduces Fuel Consumption

Properties

- Dieselcure Marine is a corrosion inhibitor. It binds and neutralizes acidic condensation, preventing acid formation which causes “gumming” and resin deposits.
- Dieselcure Marine improves atomization and lubrication properties in diesel fuels.
- Dieselcure Marine conforms to all fuel specifications and does not use Cetane boosters to enhance performance. Manufactured from Non-Petroleum Chemicals.

DIESELCURE is approved by MTU Friedrichshafen (Owned by Rolls Royce Power Systems)

DIESELCURE is approved by GMBH – Detroit Diesel Corporation

DIESELCURE is EPA (Environmental Protection Agency) registered and approved

Available in various package sizes:
11.16 FL Oz - 264 gallon flow bins
